**Comment text:**

Proposed Frampton Cotterell ward. This proposed ward seems to be too big, and although the proposal is to have 3 members, it would seem very difficult to cover, especially if the elected members were of three different political parties. It would be difficult to divide up the ward into three areas and give each member responsibility for one of them. Each member would feel a responsibility to cover the whole ward. Considerable waste of time and fuel. Would it not be possible to divide the ward into three equal parts, each with its own elected member?
