Dear Sir / MADAM

I write to protest against the proposed boundary changes in this area. At the present time the wards are clearly delineated by the major roads within the town. The suggested changes blur the edges of what at the present time is a clear and understandable plan.

The issue of the number of electors in each ward is rather nebulous bearing in mind the cement rate of development within the town boundaries which is constantly changing the number of residents in each ward.

The suggested change to the boundaries would therefore constitute a complete waste of time and public money.

Yours sincerely
