Dear Sir/Madam,

My current Inside Swale magazine, delivered today and much appreciated requests views on how many councillors there should be in Swale.

I do not have any idea of numbers but strongly feel that there should be sufficient of them so that our local councillors can beat their own patches become known to their constituents and readily accessible to them. That way we can all pull together in ensuring that the place where we live is how we wish it to be. And if it is not ordinary inhabitants can input their views and voice

To a local resident who is in a position of authority. They can represent our views and ensure that the powers what be listen to us and act, hopefully favourably! on what they hear.

I hope that this is of some help.

Yours truly
