Response to the Local Government Boundary Commission by Cllr Colette Browne MA FCIM Dear Sir/ Madam I support the desire to reduce the number of Unitary Councillors to 2 per ward, however there may be an opportunity to adjust the Beaconsfield ward to better reflect the layout of the Town and to ensure that residents are better represented. The simple way to do this is ensure all HP9 postcodes are combined into one area – The area of Beaconsfield. This will align postal codes with the unitary councillor ward. It will be much less confusing for all of the residents in the areas of HP9! . A large proportion of Beaconsfield's Green Belt land resides in Gerrards Cross ward. This should be moved into the same ward. The Green Belt around Beaconsfield serves as the lungs of the Town. Residents of the postal area of HP9 in Beaconsfield must be directly represented by Councillors who are responsible for the entire area of Beaconsfield and this includes the Greenbelt. Protecting our Greenbelt is essential to our future and livelihood going forward. The decisions we make at town & unitary level are critical for generations to come. Therefore I suggest we move the part of the Beaconsfield Old Town and Wilton Park Greenbelt area into the same ward of Beaconsfield. It makes sense. Thank you Colette Browne Could I also make a note. i am a town councillor. When filling in the drop down box there isn't an option for a TOWN councillor. Only Parish or Unitary. I would like you to recognise the subtle difference between the two distinct councils. Thank you.
