Comment text:

Whilst I agree with the proposal to move from 3 councillors per ward to 2 councillors per ward, I believe there is an issue relating to the Beaconsfield ward. Currently the Beaconsfield parish (used for the Town Council elections) is very different to the Beaconsfield Unitary ward. SE Beaconsfield is part of the Gerrards Cross ward. This means that the southern part of the Old Town of Beaconsfield, together with a large proportion of the Town's green belt sits within a completely different ward to most of the Town that it serves. Residents of Beaconsfield have a strong desire to protect their green belt and deserve the right to vote for their own Unitary candidates who propose to do that. The current ward structure does not do this. On top of this, consideration should be given to bringing parts of the north of the Town also into the same ward. Many residents of Knotty Green, Forty Green, the north of the Seeley's estate and the area around north Penn Rd and north Sandelswood End estate should also be brought into the Beaconsfield unitary ward.
