Organisation Name:

### Comment text:

The wards of Harlow need to be reduced, there are problems in every single part of Harlow and smaller authorities would be able to sort this out quickly and more efficiently than larger wards. Issues such as repairs being needed, removal of graffiti, landscaping and other works have to be more efficient. Individuals will have more of a voice in their local constituencies ,due to this, the needs of the people of the proposed new wards will be listened too. Smaller wards will lead to better standards of living such as improved parks, better services for children to grow up leading them away from crime and antisocial behaviour. For Harlow to grow economically, politically, environmentally and to modernise, smaller wards are indicative to this notion.
