Two comments: 1. There should be less Councillors. Merge some of the smaller wards, or merger smaller into bigger wards, so that there are 10 wards represented by 3 Councillors. Total of 30. We need our Council to be lean and efficient. 2. You need to look at electoral turn out. If one ward has 40% of the electorate voting and another only 10% then the Councillors who get 40% have a stronger mandate compared to the 10%. The objective of each Councillor should be to get high turn out and high vote. I appreciate every one has a right to vote but we need Councillors elected based on a high vote for their policies. I would like to see a spread sheet showing for each ward the electorate (i.e. number entitled to vote) and number of people who actually vote. Wards should be merged so that electorate and turn out are similar for each ward.
