Subject: Councilors

Categories: Submissions, Matt

Attn. Steven Lambert

Please advocate a significant reduction in the number of councilors to take Bucks from the highest in the country to the mean average. I see no evidence that the bloated representation versus benchmark is providing above average services. Indeed, there is evidence that excessive consultation is leading to slow decision making and underfunding services.

The reduction in councilor funding should be used to avoid property tax increases and to sustain services.

Yours sincerely,

[REDACTED]
