Comment text:

I live in Green Lane in Newport which is currently within the joint north and west ward and in the new proposed north ward. I would prefer the current system of two councillors sharing the ward to remain as this provides options for the two councillors to jointly share the load and work together on behalf of residents. It also means that certain issues which are of particular interest to one councillor can be directed to that person and other areas of interest to the alternative. We are lucky that our two councillors, Tim Nelson and Peter Scott, are both committed to Newport, its community spirit and residents. I am aware that this is sometimes not the case with all representatives, and personalities can come into play. Having two councillors sharing an area means this can be overcome which can be beneficial to both the councillors and residents.
