

## Bolton Borough Council

### Personal Details:

**Name:** Nick Peel  
**E-mail:** [REDACTED]  
**Postcode:** [REDACTED]  
**Organisation Name:** Bolton Labour Group

### Comment text:

Submission by Bolton Labour Group and Bolton Labour Party for the whole borough. Our submission assumes 3 Councillors per ward, and satisfies the 3 criteria: 1. Equity of electorate size per ward 2. Boundaries encompassing distinct and natural communities, 3. Boundaries being geographically logical, by using physical barriers such as rivers, railway lines and major roads as natural boundaries. We have attached maps and data tables that show the geographical and population results of all our proposals. As is the case with the existing boundaries, it has been necessary to group some smaller communities together, and we have chosen geographically relevant names to reflect and respect the populations wherever necessary. We have not used the existing ward boundaries as the starting point per se, however it is clear that existing ward boundaries are already in many cases based upon existing identifiable communities. Our 3 starting principles are: 1. The existing under populations of the 4 wards to the east of Bolton; Little Lever, Brightmet, Tonge and Bradshaw. 2. The logical desire to create a single ward that covers Bolton town centre, an area of huge projected population growth, which means that existing boundaries will make no sense. 3. The significant overpopulation of Horwich and Blackrod, and Westhoughton North. The current Little Lever ward also includes Darcy Lever. Many in the Long Lane area of Brightmet consider themselves to be Darcy Lever residents. To counter the current underpopulation, we propose to expand the Darcy Lever area, to create a new ward of Little Lever and Leverhulme, with Leverhulme Park as the recognisable link for the Darcy Lever community. The areas of Brightmet and Bradshaw are separate communities. The current boundary cuts an established social housing estate in 2. This artificial boundary was created in 2004 to address an under populated Bradshaw. We propose to instead expand the Bradshaw area to the railway line that currently dissects Bromley Cross Ward in 2. There are natural community and transport links between the existing Bradshaw area and communities served by Bradshaw Brow and Turton Road. The areas to the east of the railway line such as Grange Road, can only be accessed by vehicles from Turton Road, and there are no links between these communities and those off Chapeltown Road. Our proposal therefore would expand Brightmet northwards to include, once again, all of the actual community of Brightmet, and create a new ward of Bradshaw and Bromley Cross. The area to the north east of Bolton is historically known as South Turton, with distinct communities at Egerton, Dunscair and Eagley. Parts of the latter are currently split between the existing Bromley Cross and Astley Bridge wards. We propose to keep all the communities of South Turton in one ward, and name the ward South Turton. This ward is defined by the railway line to the east, Eagley Brook to the south and Belmont Road to the west. The Eagley area is reunited in this ward, with houses off from Andrews Lane being together, as opposed to houses off Sharples Hall Drive. These proposals would leave this new ward underpopulated, therefore a new border is proposed that runs between the streets of Staveley Avenue and Eastgrove Avenue, reflecting the communities of Astley bridge to the South, and South Turton to the North. The Tonge with the Haulgh communities are separated from other urban areas by Bradshaw Brook to the East, and the railway line and the major road, St Peters Way to the West. Tonge is underpopulated. The Haulgh area could expand southwards into Darcy Lever, but this would cause an increased under population on the existing Little Lever and Darcy Lever ward. We propose to instead expand the Tonge area north west to include the new estates centred on Kentfield Drive, which includes the Crompton Health Centre, a health centre of choice for existing Tonge residents. This new ward would also include the area of Firwood Fold, an historical part of Tonge. Turning to Bolton town centre, we aim to create a single ward for the new planned town centre community. The housing to the north of Topp Way, off Vernon Street and Gaskell Street, within the existing Halliwell ward, are already town centre based. The open land running between Gaskell Street and Valletts Lane, with Mortfield Lodge at the centre, is a natural northern boundary of a town centre ward. The southern boundary is drawn primarily on St Peters Way and Trinity Street, which are major road barriers to what is defined as the town centre. To the west, there is an existing odd wedge shape of the southern part of Smithills ward, reaching down to Chorley New Road, making no community or geographical sense. Our town centre ward would therefore have a western boundary at Devonport Street, bringing the terraced housing community

centred on Harrow Road into one ward. The final part of the boundary is proposed to be Tudor Avenue, bringing the town centre based communities to the east of that line, centred on Dobson Road into the new ward. The logical name for the new ward, as characterised by the central feature at the centre, is Queens Park Ward. If these changes are accepted, there remains a population of 21,865 in the centre and north east of Bolton, centred on the historical Astley Bridge and Halliwell areas, currently dominated by a ward of differing communities, known as Crompton. We propose that the physical boundary at Astley Brook be the natural southern boundary of Astley Bridge, bringing the Seymour Road area back into Astley Bridge, with the major shopping area around the junction at the centre of this community. The Hall ith Wood Estate to the east, is a geographically stand-alone estate that could feasibly join Tonge or Bradshaw, but with the consequence of a knock-on effect of a significant exceedance of the population. We therefore propose that Hall ith Wood join with Astley Bridge, linked by Crompton Way, to be the new ward of Astley Bridge and Crompton. The remaining urban area in the central part of Bolton, based around Blackburn Road and Halliwell Road, north of the town centre, to become Central Bolton, however we aware that there may be more imaginative name suggestions. Turning to the overpopulated wards in the west of the Borough. The existing boundary between Horwich and Blackrod and Horwich NE, along Victoria Road and Fox Street cuts through a single Horwich community. We propose that a new Horwich North Ward is created with its southern boundary at the natural physical barrier of Chorley New Road. This will significantly reduce the over population of Horwich and Blackrod. The south eastern boundary of Horwich and Blackrod is also redrawn, further reducing this over population, by moving smaller areas to the south of Bolton Golf Club into a Bolton, rather than a Horwich ward. The new Horwich South and Blackrod ward is 10,868, +1.5% over, rather than the existing 13.5% over. To create a more geographically centred ward of Horwich North, we propose that the unusual boundary at Bessy Brook be redrawn to include the Princess Road area with a Bolton rather than a Horwich ward. The current Smithills ward is an anomalous ward of differing communities. We propose a new ward defined by the expansive moorland to the north of Bolton, centred on Smithills Country Park. The northern part of this ward is linked by Scout Road, Walkers Fold Road and Bottom O'th Moor. The urban area of this ward to the south, includes communities centred around Moss Bank Park and takes the Heaton area to the north of Albert Road West, with the ward name of Heaton with Smithills Moor. The large area from Junction Road, via Lostock train station to Lostock Lane is defined locally as Lostock. The name appears in the existing ward. We propose to create a new ward centred on Chorley New Road and Beaumont Road, and add the Chew Moor area to this area, as linked by Tempest Road, to create the Lostock and Chew Moor Ward. The area of Chew Moor is separated from the Westhoughton community via the M61 and is more logically linked to the Lostock community via tempest Road. We propose that the northern boundary of Westhoughton North becomes the M61 motorway. Along with some minor changes to the boundary between Westhoughton South and North, 2 new wards are created with populations of 10,681 (north) and 10,685 (south), with no variation in either. In addition, the separate community of Hunger Hill, attached to Westhoughton North should be reflected in the name. The entire area of Bolton south east needs little changing from the existing communities. Little Lever has been covered. Kearsley, a geographically separate community is linked only to the urban area of Farnworth. To reflect Kearsley's over population, we propose to alter the boundary with Farnworth so that areas to the south of Frederick Street, re-join the areas to the North, to again become part of Farnworth. As a result of the new boundary with Kearsley, Farnworth becomes overpopulated, however we propose that the area to the east of Harper Green Road, including the secondary school and the Cawdor Street area, already within the defined geographical area of Harper Green, join the actual Harper Green ward. There are minor changes to the boundary between Harper Green and Hulton, that better reflects the communities off Ellesmere Road. The current boundary between Rumworth and Hulton runs down Dean Church Lane. This boundary separates the same community on either side of the road, and we propose that the estates to the west of Dean Church Lane join Rumworth Ward. These changes leave a population of 21,085 in the defined Great Lever and Rumworth areas. We propose an alteration to the boundary, moving areas near the University to the east of Cannon Street, from Rumworth into Great Lever, meaning that all University buildings are within the one ward
