### Comment text:

I would like to join with other residents in expressing my opposition to the Boundary Commission proposals which would affect Astley Bridge. Astley Bridge is a historic area and has strong community links which are difficult to find in other parts of Bolton. Local community groups work alongside our local Cllr's to deliver local events which are well attended by residents from across the ward. These are often centred on Andrew Lane Park which I note is to be removed from the ward. The current proposals would move residents that live around Templecombe Drive and Eagley Bank, that are heavily involved in these activities out of the ward, into a new ward of South Turton, comprised of areas with which they have no real connection. In short, these proposals split an existing thriving community and force a number of residents into a new ward with which they are not naturally connected.
