Drear The Review Officer (Brighton & Hove),

As a resident of Brighton marina and previously Kemptown I wish to make the following suggestions to your proposals.

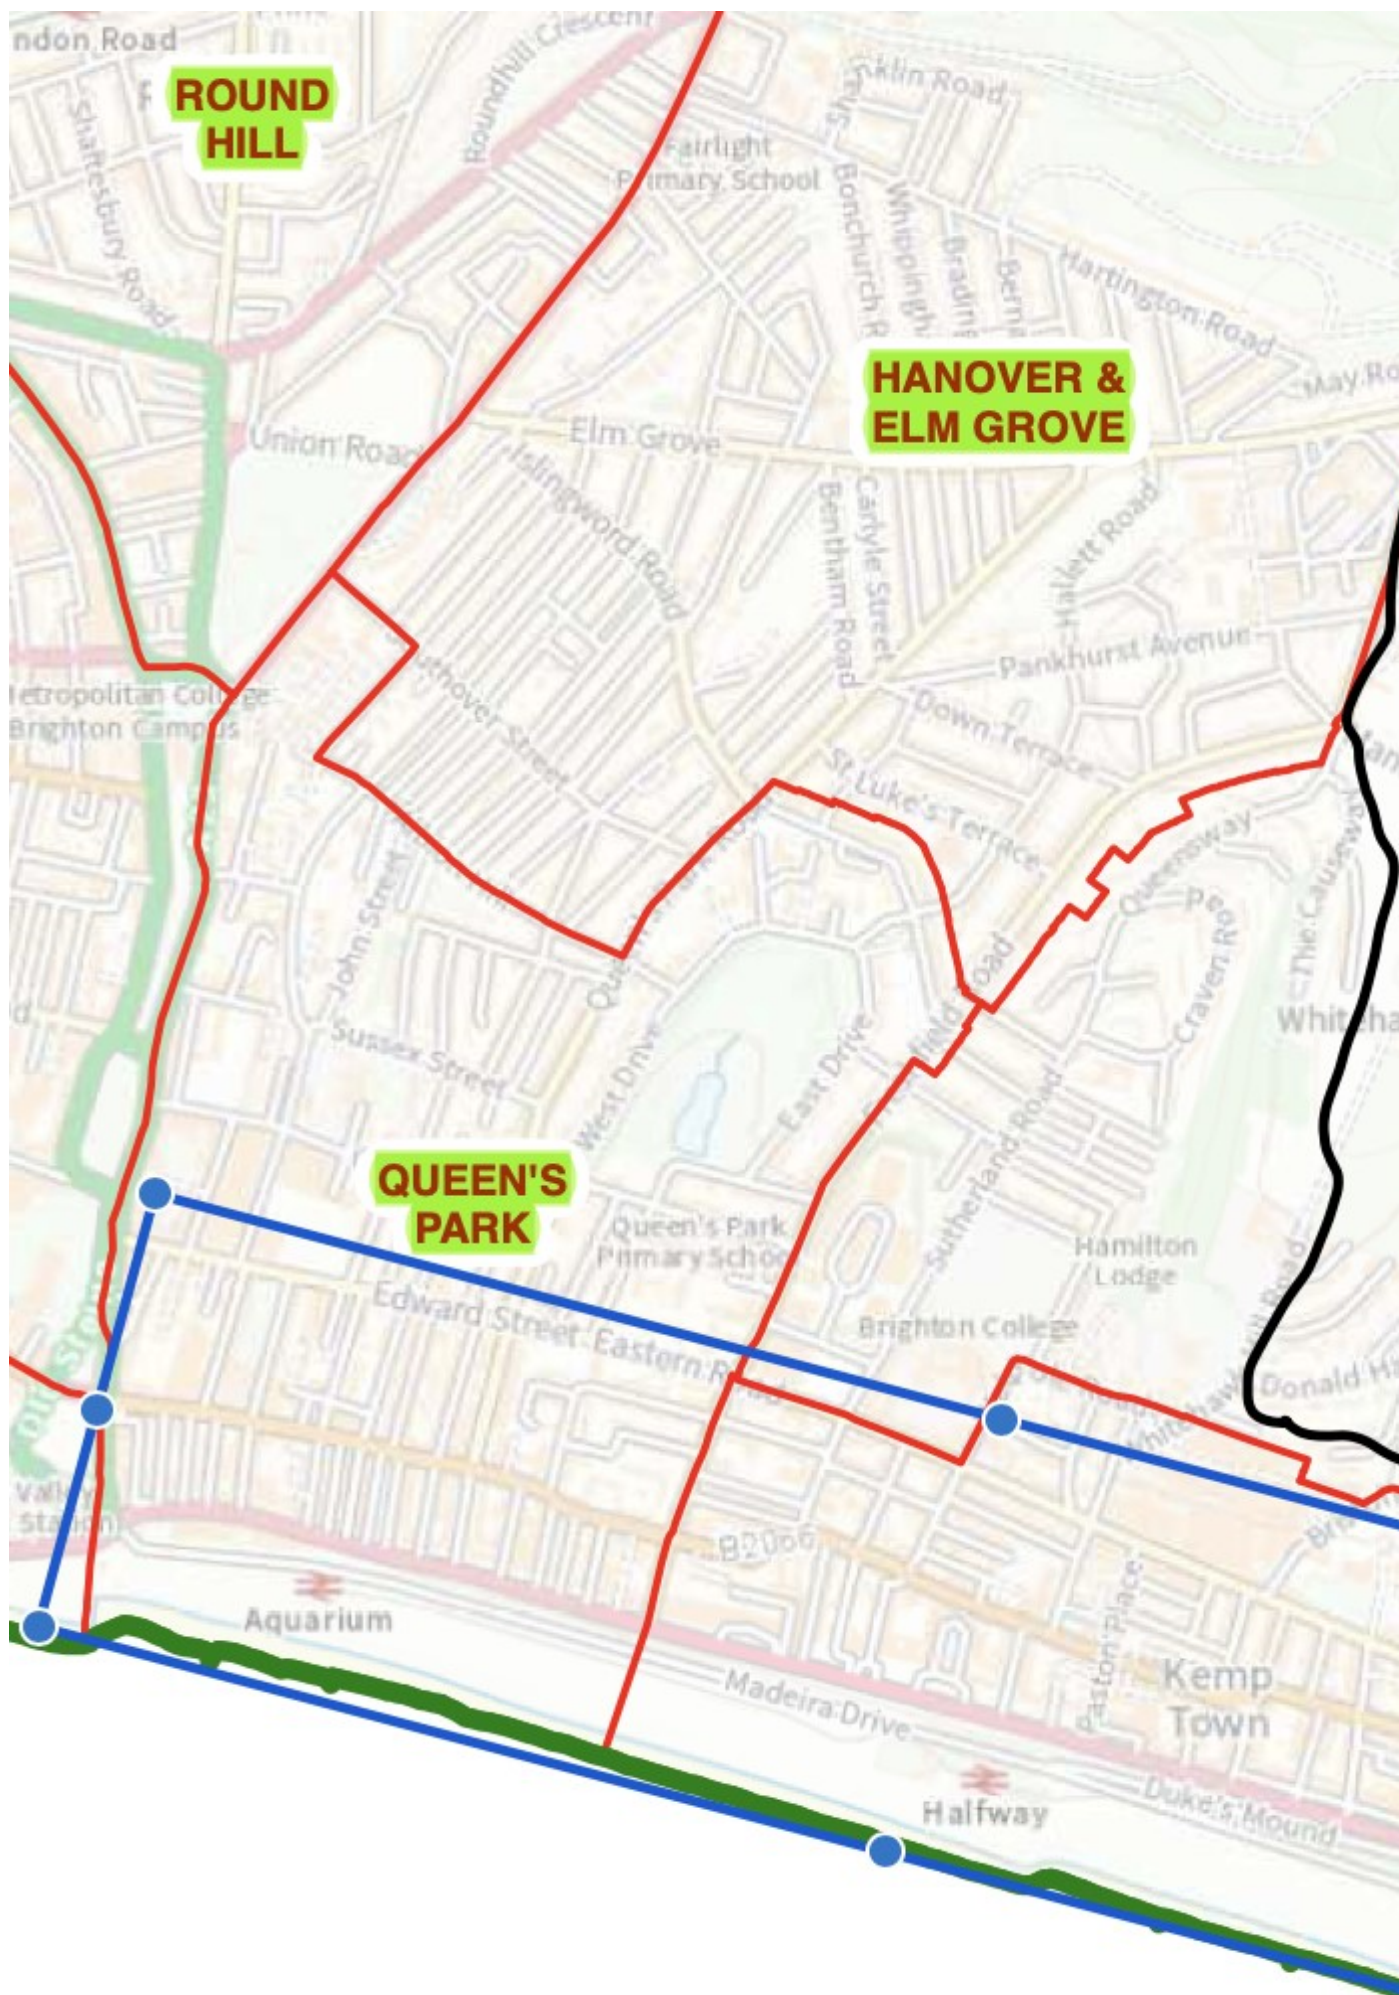

Points of disagreement for current proposants:

- The Roedean and Marina parts of the Kemptown and Marian ward are significantly different in character with few community links. Kemptown is highly urbanised with lots of homes of multiple occupancy, In contrast Roedean is the opposite of this with stand-alone properties bordering the countryside, having a lot more in common with the northern area of east Brighton, and economic links with the marina.
- Kemptown has its own economy for local residence, with its own shops and high street, running along St James's Street. In contrast Residence of Roedean, the Marian and Whitehawk use the large Asda in the Marian.
- Residence in Kemptown consider Kemptown running from Brighton pier to Sussex sq, and indeed there are many residence and conservation groups that span this area.

Based on these point, I would like to propose these new wards. I understand that some of these boundaries might need to be changed a little to make up the variance required, if you can draw up your final proposals based on this, I believe it would much better reflect the communities and allow for better representation of the wards.

Blue = Kemptown Ward

Black = East Brighton & Marine

Kind Regards,
