### Comment text:

In regards to the division of Patcham into two separate wards, I object to this as a resident of Patcham for 50 years. Splitting the area in half is an infringement on our identity as Patcham residents. Our voice and representation will be diminished as the interests of our area will be divided. How can our village and area be split and then effectively represented by councillors who will have a greater responsibility to the areas Patcham is being merged with as these areas also have their own identity and interests. Patcham requires representation as a whole at the level of the City Council.
