Comment text:

As a resident of Wolsingham in Weardale I think it's imperative that we retain our current constituency so that as a rural and geographically diverse area, our needs and views can be served by our local councillors. The distinctiveness of the constituency requires the representation of councillors who know and understand the needs of the communities and area they represent. If the current political organisation of constituencies were to be changed as proposed, this would be lost. The issues and concerns of the communities that make up our current constituency are very different from other communities in the proposed re-organisation. I oppose this proposed change.
