Comment text:

I think that the commission should where possible change all the former geographical areas of Corby Kettering East Northants and Wellingborough. The council is struggling to break off the shackles and become one council. It has not helped having separate regional planning committees. I think that having parliamentary boundary areas should be taken into consideration but in no way should the commission be influenced by MPs and political interference. I wouldn't rule out the suggestion for having more wards with one or two elected councillors. Look at Earls Barton Ward and Thrapston ward for instance.
