Comment text:

I am a Unitary Councillor and live on the western side of the railway in Finedon Ward (this side is locally known as the Victoria area). I'm requesting more from the point of view of a resident than a councillor, that Finedon Ward as it is, should not exist in its present form because the problems of its western side are predominantly to do with urban matters. There is a lot of poverty, and there are many recent immigrants, and also the property in the area is very largely privately rented. This is a complete contrast from the settlement of Finedon, which has a long-established population, has far more owner-occupation, and being semi-rural, does not have the same sort of issues at all. This makes representing the whole existing ward much more of a challenge than other wards. Please therefore consider having a ward boundary to approximately follow the railway, thus separating Finedon from the Victoria area of Wellingborough, as I believe that this would improve the quality of representation for both sides of the existing ward.
