### Comment text:

How ridiculous are these proposals? Leave Rusthall alone. If the proposed boundary changes take place Rusthall will lose its unique historical setting within the borough and indeed within Kent. On another point it's difficult enough as it is to communicate with government representatives and having 2 local parish councillors who actually live within the parish and know the issues is so important to the added value of living in a small community like Rusthall. Proposals for the change in boundaries would see this change dramatically and to the detriment of local people who have local concerns. Please, do not ride roughshod over us 'little people'. We have the power to elect or reject the people who govern us both at local and national levels. We deserve to be not just be heard but to have our views taken seriously.
