Related subject: Preston Capes moving to a different area

I think the idea is totally irresponsible and a waste of tax payers money. Why was this not considered when the new council was being set up to re-arrange after such a short period seems typical of the short sighted authority thinking. Preston Capes has affiliations with villages in the current set up so why is it even being considered for moving to a different area. It will be so remote and disconnected from any of the new councillors I cannot see any improvements for the residents of the 2 villages of Preston Capes and Little Preston and can only foresee a decrease in the already limited assistance we receive from some of our present councillors
