Comment text:

The inclusion of the Markby Way (in particular) and Sellafeld Way areas within South West Earley seems a rather poor fit. They are very much outliers with the rest of that proposed ward . They share far more in common with South East Earley or even North Earley, both geographically and also with regards to facilities - for example catchment areas schools, road access, and recreational/ green facilities. The western boundary of South East Earley could be moved east to accommodate these areas, with the impacted properties there being moved into South West Earley instead with whom they have much more in common.
