Stafford Borough County Divisions

Final recommendations by Ant Reid

Basis for recommendations:

- 1. Barlaston, Fulford, Swynnerton & Oulton: These wards move to a new constituency that is mostly city. There is value is having one county councillor for the three rural wards.
- 2. Two current divisions are very strange: Eccleshall, and Stone Rural, need to be examined and made more rational.
- 3. Urban encroachment by Stafford into rural wards is not currently represented adequately. Having urban wards encompass such housing developments has value for the residents.
- 4. Where practical, respect ward boundaries (but bear in mind point 3 above).
- 5. Definitively respect existing polling district boundaries.

Recommendations:

- 1. A new division for Barlaston, Fulford, Swynnerton & Oulton. This would be 2% above Stafford average. Tentatively called 'Wedgwood' in this list
- 2. One division for Eccleshall and Gnosall, which requires one polling district from Seighford ward (Ellenhall SFB). At 94% of average, this is now the smallest division.
- 3. Stafford North to additionally take the Creswell polling district (SFA) from Seighford ward
- 4. Stafford Central to additionally take a polling district from Milwich ward (St Mary Gate MHL) and lose some PDs to the west and south.
- 5. Stafford South East to additionally take Milford ward, and the one Baswich poling district not already included. This now precisely matches ward boundaries.
- 6. Stafford West to be renamed "South West", and to include Penkside ward
- 7. Gnosall and Doxey to be replaced by a new division "Stafford West & Rural", covering Rowley, Doxey & Castlefields, and the remaining PDs from Seighford & Church Eaton.
- 8. Stafford Trent Valley to now include all of Milwich ward (except for MHL) and one ward from Stone Urban (SCE)
- 9. Stone Urban to now contain the whole of Walton, but now cede one PD to the south SCE.

These changes would provide nine divisions all closer to the target 2028 average, and more adequately reflect the character of the areas, respect boundaries more consistently, and anticipate future developments better.

New Division	Electorate 2028	Average
Eccleshall & Gnosall	11,304	94%
Wedgwood	12,262	102%
Stafford Trent Valley	11,843	98%
Stafford West & Rural	11,224	93%
Stafford North	12,301	102%
Stafford Central	12,241	102%
Stafford South East	12,091	100%
Stafford South West	12,777	106%
Stone Urban	12,312	102%
Target Average	12,039	

Options within this plan

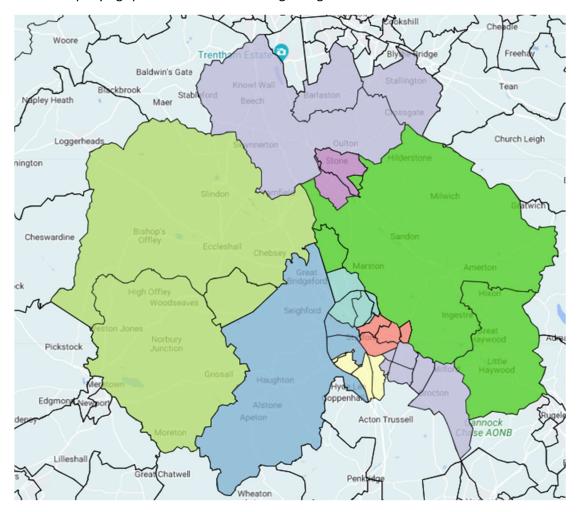

An alternative that appears to be precluded by the remit of the consultation is to combine the new Stafford West & Rural with the new Stafford South West to form one 2-member division. Given the urban encroachment in this area, there is merit in considering that option. Alternatively, one PD from Western Downs could be included in the Stafford West & Rural division, perhaps HWC.

If splitting polling districts is possible, then the following polling districts could sensibly be split to allow for better *natural* boundaries (eg along railway or motorway):

- SCE: to split the PD at the railway line, and include western portion in Stone Urban.
- SFA: to split the PD at the motorway, allowing Creswell itself to join Stafford West & Rural
- MDA: to split Walton-on-the-Hill from Milford village, allowing Milford & Brocton to remain in Stafford Trent Valley.
- MHL: western boundary to be aligned with the stream, instead of through the middle of the estate (negligible impact)

Details

See the accompanying spreadsheet for details regarding the PDs to be in each new division

How do I enter my electorate data?

- 1: Type in all your data, by polling district, in sheet "Electoral data". Use the left-hand table, which is columns B to I.
- 2: It's important that every polling district is listed separately. Use your polling district code to identify polling districts in column B. If you have another description, or something else that you think would be helpful in order to identify the area, put this is column C.
- 3: If the polling district is in a parish, fill in the columns for parish (column D) and parish ward (column E). If there are no parish wards in the parish, or the polling district is in an unparished area, leave this blank.
- 4: If the polling district is in a parish which is part of a joint or grouped parish council, fill in the name of this group in column F. Make sure that this column is filled in for all parishes in the group.
- 5: Fill in the existing ward name in column G.
- 6: Enter the current electorate figures for each polling district. Then enter the figures which are predicted for five years. Although we recognise that you will be using a particular formula or method to work out these projections, make sure that the figures are rounded to a whole number before entering them in the spreadsheet. All polling districts should contain an approximate number of whole electors rather than fractions of electors. We work out the predicted electorate of the parishes, district wards and county divisions by building up from polling districts.

How do I check my data?

- 1: If you would like to check your data, use the table on the right. Above the right-hand table is a box called "Check my data". This shows you the total number of electors in all the polling districts. If this isn't right then there is a mistake in the left-hand table.
- 2: Once you have entered all the electoral data in columns B to I, then put in the names of the wards in column K. The spreadsheet will match what you type in column K to what you put in column G. It will add up the electorates of the polling districts in each ward.
- 3: In column L enter the number of councillors for each ward. Once all the numbers are entered, you will be able to see whether the ward is over-represented or under-represented, and by what percentage. (This will only work when the number of councillors has been filled in for all wards.)
