Related subject: Battenhall & Nunnery wood

We currently live on Red Hill Lane and have been part of the Battenhall ward since we moved here. We feel closely aligned to this ward and that it represents our views well. We spend our leisure time using the green land in Battenhall and use the local services in the area such as the pharmacy, dentist, church hall (our covid vaccinations were provided from here as well). We feel little relationship to Nunnery wood and in fact believe that we will be overlooked if moved into Nunnery wood as they have much bigger issues with a number of schools, county hall, and commercial sites such as sheriff street. We feel moving us into Nunnery wood would be detrimental to our representation and provide no added value to either ward. Please stop time, effort and cost working on things that have detrimental impact to your electorate and focus on helping people with the really big issues of the day such as the cost of living increases, employment, health and education. I dread to think how much of local councillors time and the money that has been spent on this instead of caring for the people of Worcester. You are not helping anyone by moving ward boundaries, the only beneficiaries are council members. Do what you are elected to do and make Worcester the best it can be with what you have.
