Absolutely and utterly disagree with being part of a boundary with Wiltshire. We come from and have lived in Gloucestershire all our lives and do not wish to be classed as Wiltshire. This smacks of ridiculous administrative boundary changes for absolutely no reason whatsoever. It's goes back to the days when county names were changed for no reason and after a huge waste of time and taxpayer money , many reverted back to their original spelling.

It needs to stay Cotswolds and Gloucestershire and nothing else. We don't live in Wiltshire and don't want to. It will cost a fortune to change every piece of paper and digital footprint at a time when every local service , business, health authority and social service , transport and councils are suffering economic hardship. Do not spend taxpayer money on this utter rubbish. Money is desperately needed in the rural villages as the roads are so bad it will cause a death with numerous and dangerous potholes shortly. Rural schools are constantly fighting for budget in comparison with urban schools. Buses run so irregularly in the village that they become impossible for people with health appointments and so petrol and cars are needed constantly as villagers can't walk along A roads for miles to get to town. Parking charges are shocking and killing town footfall. Witney had free parking and is thriving. After 3 pm free parking was stopped by the Liberals along with cash in the parking machines. I've seen elderly people totally bemused by the card machines and apps are for those with smart phones. And now more money wasted on unbelievable boundary changes
