I feel a greater connection to West Park ward both in geography and community. West Park is numerically smaller than other Wards in the borough so could take some expansion from Simonside and Rekendyke. Additionally, work volunteering for elected officials has highlighted some vagaries in the Westoe and West Park border this could be made much more geographically regular with both sides of a street being within the ward rather than a pan handle. This would again be to raise the size of West Park to a comparable size as other wards in the borough.
