As an active member of the community in Coundon for 25 + years and children attending local schools . We are witnessing the increase in plans to develop greenbelt land (the Coundon Wedge) which will intensify the level of traffic in the already congested area , extensive demand on services and consequential impact on the environment , and level of disruption to the local community

It does not appear that local councillors are representing fully the views of local residents or allowing for the local community to present their opinions before the plans are already published forward

I would wish to be involved and represent the views of neighbours and local residents in an open consultation .

The rise in the local population suggests that an increase in local councilors would be warranted who act in an unbiased and neutral view , based on where they live within the city boundaries .
