Related subject: Splitting "The Dittons" district

My wife and myself see little merit in changing the existing status quo. We do see our life very much intertwined with both Long Ditton and Thames Ditton, and this reflects the community links that have existed historically between both areas. I recognise the need for partitioning the urban fabric in units that provide fairness in representation and management, but that objective should not override historical and community links experienced by most people living in the areas concerned.
