I disagree with the proposals for B&T (and Stroud Trinity). Your report actively states that this isn't a great merge for the exact concerns I've got. Where we have got good local representation that feels like it meets with our needs, our community will now be a small electorate within a fairly different demographic of the rural communities of Painswick, Bisley and the villages. Note spatially as well, these are completely different valleys where our community needs align more with those of our neighbours in the golden valley.

The lack of publicity around this 'consultation' is poor as well. Many of my neighbours, and I, only found out about this 3 days before it closes. This could have significant impact on us and getting our voices and views heard locally.
