### Organisation Name:

### Comment text:

1. Wards should encompass whole parish council areas. 2. This is the chance to take account of projected population changes and potential new parish areas. 3. Knowing these a reasonable population size per ward can be agreed and the number of councillors can be determined. The number should not be just the arbitrary choice of 98, presumably serving 49 wards. 4. High Wycombe town centre should be a separate ward AND should be parished! There is plenty of scope to amend internal ward boundaries in High Wycombe to allow this to happen. 5. Marlow should be one ward. 6. Boundaries in Aylesbury should be coincident with new infrastructure eg. HS2 and the Southern and Eastern bypass new roads. 7. All of Aylesbury's wards can be amended to recognise the considerable local house building. Currently the boundaries are arbitrary and have little geographical sense in some places.
