Comment text:

I think the Commission should consider making the new boundary for the existing Benton Ward to extend along Great Lime Road as far as the Palmersville Metro Station. The number of electors would go slightly over the 10% margin but there would be the enormous benefit of the boundary being the Metro line and a major arterial road instead of being lost in a residential housing area. A small number of electors in the existing Killingworth Ward would end up in a tiny island separated from the rest of Killingworth by the very busy Great Lime Road. I also believe that the name should be changed to Forest Hall. It is by far the largest single component of the ward. There is often confusion with the neighbouring Longbenton Ward which sounds very similar. The name Benton appears in numerous places outside the existing ward boundaries. When you drive into Newcastle there is even a Benton Garage on the left side of the road.
