Comment text:

I do not think we should have the St Mary's boundary line where it currently is and also the Valley wards boundary line too. This is green land that is currently part of North Tyneside yet in my opinion this land should belong to Northumberland council. Seaton sluice is a Northumberland ward (Council taxes paid to) and is not part of Whitley Bay (North tyneside) If we are going to keep this land then plesse sell it on to developers or build some social housing on it and then we can up the housing stocks or house the people who are in desperate need, for example all of these poor unkrainians that we as local residents are putting roofs over their heads. This area is a place where there is very little built up on it unlike other local coastal towns a villages. Why is this? This green land is a bit like no man's land if this is North Tynesides land to upkeep then can we please do something useful and worthwhile with it. Whitley Bay and all of the way along the coastline are being built up with apartments, houses and businesses and yet this area has nothing like this, but it should do. We have no housing available to the people who so desperately require it and in my opinion I think that this is very unfair to other residents of North Tyneside.
