

## Epping Forest District Council

**Personal Details:****Name:****E-mail:****Postcode:****Organisation Name:****Comment text:**

My comments/suggestions are based on being an Epping Resident for 30yr years. And I have a reasonably good understand of local politics, and the (still to be signed -off) Local Plan, and the intended locations for major housing developments , new employment etc. To me, mainly due to the proposed geographical boundaries, and the current and predicted future population growths I dont agree with the proposal for North Weald Bassett, Epping Lindsey & Thornwood Common, and Epping Hemnell Wards. I would like to see Thornwood to be included in with the North Weald Bassett so it replicates the same geographic coverage of the Parish Council. This would be supported by the intention of EFDC to build more homes on the Airport land. And the land earmark for homes east of the airport land. Secondly, I would recommend the merging of Epping Lindsey (less Thornwood Common) with Epping Hemnell to better represent this market Town and be closer to the Epping Parish council geographical boundaries. This change will then allow for a second look at the other neighbouring proposed Wards. ...and means that the residents will have much more meaningful and clearer demarcations lines for Parish and District councils.
