Subject: Malvern Hills District Council Draft recommendations

Categories: [REDACTED]

In so far that there has to be a reduction in seats and new boundaries to accommodate this (a proposition I do not agree with) I would support the recommendations as relating to the proposed Hallow and Holt Ward and the Broadheath Ward.

I find the present size of Hallow Ward allows me great contact with its residents, most I believe know me, or of me. Locals find it easy to communicate their concerns to me both formally and informally and I am able to engage in many of the activities that take part within this community. At a stretch I will be able to do so when Holt is joined to it; it makes a geographical coherent area, communications through it are strong and there are strong educational, social and family links through out the area.

I believe that Broadheath would benefit from having a single member dedicated to it, it is very much a nuclear area, any areas joined to it would be perhaps overwhelmed by its dominant interests.

I would worry that Rushwick with its strong impending growth will not be sufficiently represented without having a dedicated member... and I believe that consideration should be given to adding on to the total number of councillors to accomplish this

Cllr Dean Clarke

Malvern Hills District Council
