Comment text:

As a resident of Abberley for over 20 years I would like to object to the first recommendations of the Boundary Commission and fully support the alternative arrangement suggested by Abberley Parish Council. The suggestion of Abberley PC is a far more sensitive plan. It retains very important existing social links and is far more practical and efficient from a geographical point of view i.e. travel within the ward as well as communication links with local towns and villages that constituents already use for services, schools, the medical centre and shopping.
