### Organisation Name:

### Comment text:

The strength of our democracy is in local participation. The more local the representative the better involved residents become and the more they feel consulted. The current system is poor on both counts. The area is too big and holds three candidates, all elected through first past the post voting. This leaves residents feeling disconnected with the local political system. Fewer candidates for the area but all (both) elected through a propotional representation system will see real democracy and accountability on our local political system.
