My wife found this document on Facebook. I make the following comments. 1. As a Bracknell resident who is registered to receive information from my local council, I am surprised that we have not received any formal notification. 2. Where is the supporting documentation surrounding the reasons. 3. Please don't open communications with the statement "We have an open mind". Our local politicians have anything but and only seek to serve their own self interest. The people in Bracknell clever enough to manage the borough are clever enough not to want the job. Those who want and have got the job should not me allowed within a mile of running the council.
