### Comment text:

I have concerns about some of these proposals, which I really hope the council will address when finalizing its recommendations. In particular, I see that, as a resident of Wildridings and Central, I would be moved into the new Central Ward under the draft proposals. However, this proposal reduces the number of councillors from two to one. Expecting one councillor to shoulder all responsibility for a ward seems bound to lead to problems for residents. What if they are sick? What if that one councillor is not up to the job? This could lead to those of us who are residents of this ward being denied effective representation.
