Does the creation of (wisbech, leverington) imply that it will become like walsoken and be merged into wisbech with westward expansion ? are you creating this ward to then fill it with the 12,000 homes earmarked under the defunct wisbech 2020 vision or the equally misguided wisbech garden town scheme to open up the housing market to cambridge investors to buy to let people who commute to cambridge etc. and of no benefit to the local long suffering people of this district ? it seems to me the council does these things to the detriment of fenland and the north of the county to support the unequal allocation of taxpayers funding on cambridge city south cambs and ely where the rich people live and where bus services public transport facilities and every oncreasing rail-link, for the cambridge gentry at the cost to people in the north of the county, these boundary changes serve nothing more than to reduce the amount of councillors to the north so that the south can continue to adversely scrape the barrel of money, that is the cambridgeshire pyramid scheme.
