

Dear Commisioners, I purchased a house in East Brighton not Rottingdean and for very obvious reasons wish to remain in the East Brighton district. This road is not part of the Marina waterways leasing and unfinished regeneration of this entire area, nor are we in any way related to the outer village of Ovingdean. I don't believe it's ok to change the district that we bought into, just because you require councillors to fit the landscape. This can be done without the need to change the very foundation of district we have made our homes. This should not be considered as connected to political agendas for which this implies. To outcast this part of East Brighton to Rottingdean seems to point to more underlying conspicuous reasons for which I don't believe we are being given transparency here. You have my view and stand by the rights to all who have invested in living and working here as East Brighton.
