

I know this is about wards, but you just can't take Elm Grove and Hanover out of Brighton Pavilion Constituency. The suggestions in this respect are a deliberate political move to oust Caroline Lucas, this country's only Green MP and a far more effective opposition than all the other parties combined. I'm not even a XR activist but we are all well aware that there is a climate emergency, and boundary changes or posed for the Pavilion constituency will do a huge disservice to all of us and future generations. Plus she is a great constituency MP. My current MP is Peter Kyle but it was Caroline Lucas for a long time, and she's so much better at her job. Don't do this to Hanover and Elm Grove or indeed the country.
