Comment text:

I would like to suggest proposals, but I would like them to be based on recent population data. In the meantime, can I suggest that until the 2021 census output products are published that this review is premature? How can decisions impacting a population, be made with a reasonable degree of intelligence; with outdated population data? I'll review the 2011 data and attempt to make suggestions based on that in the meantime. Kind Regards
