Comment text:

I am content with the number of councillors for Newport N&W and S&E i.e 2 for each ward. I am not content with certain disparities that exist between the Town Council Boundary and Borough Boundary. To explain: 1. The existing Boundary for SE is Mulberry Close which really falls into Church Aston, the boundary logically should end at the mere on Ashworth Way at number 50. 2. The Borough boundary puts the new development Wright Avenue into Chetwynd Aston which makes no logical sense. The residents think they live in Newport and use Newport facilities. Chetwynd Aston & Woodcote PC have no facilities to be able to satisfy these residents, schools, churches etc. The boundary logically should be the main A518. These 2 issues require investigation to achieve some alignment between Newport Town Council and Borough Council instead of the current nonsensical existing boundaries.
