### Comment text:

I am writing to express my view that Bassett Green Village, including SO16 3NB, should remain connected with the rest of the existing Bassett Ward. It's character is similar to those in the rest of the Bassett ward and differs significantly to that found in the neighbouring Swaythling Ward. Currently, Bassett ward is one of two wards that are part of the Romsey and Southampton North parliamentary constituency. Bassett Green Village is an area with listed buildings and matches the constituency profile of Romsey & Southampton North rather than either Southampton Itchen or Southampton Test. Remembering that wards normally expect to have populations broadly similar in size I would not expect to see changes to the current Bassett Ward. The area is unlikely to see major increases in population as a result of the Bassett Plan. Consequently, ward boundary changes to accommodate a potential increase in 3 councillors on the City Council would best be located where the city is expecting and planning the largest increases in population in the next 5 to 10 years.
