Comment text:

I am concerned about proposed changes to Bargate ward. The ward has a natural divide along the city centre parks which would be a natural division between the east and west sides of the city centre. A division along the lines of the west side would tie the communities in the old town with the Polygon which share common issues and problems associated with city centre economy, parking, students and the proposed development of the Station Quarter and West Quay road. The east side of the ward ties the communities along Ocean village, the river Itchen, Kingsland etc Banister Park would fit in more naturally with Bevois ward taking it out of Fremantle.
