### Comment text:

Really? You say "Get Southampton Moving" but all you appear to do is slow it down! I'm sure you know that Southampton is known as "traffic light city" which impact on air pollution because of car emissions and, I find now, that it takes me forever to get anywhere, which again impacts on air pollution. I currently do two extra miles every time I want to get round these roadworks, then an extra two miles back - how green is that ..... not! What with changing Ward boundaries and countless other unnecessary jobs, it would be good if you could focus on far more important ones. If it's not broken, don't try and mend it! Not impressed!
