I believe rural wards should have, on average, slightly fewer (say max 10%) than urban i.e. Northampton wards, to offset larger geographic size. Current arrangements appear to favour Northampton I.e. more councillors per head. I believe this to be wrong and leads to an urban bias in decision making to the clear detriment of the former Daventry and South Northants district council residents. The WNC proposals appear to seek to retain this urban bias, which is unfair I believe.

Proposals build in disproportionate representation for urban areas at the expense of rural areas to the detriment of the latter. This needs to be reversed. I would also support a reduction of councillors by one third to enhance decision making and improve cost effectiveness.
