1. One side of Manor Road falls under Littleover and the other side of Manor Road falls under Abbey ward. I believe the whole of Manor Road should fall equally under littleover. This makes it very unfair for school applications etc depending on which side of the road you live on. 2. There have been far too many accidents since living on Manor Road resulting in injury and damage to vehicles, properties and lives. There has been no facilities put in place on the road to minimise dangerous driving by speeding. Lives are at risk by the speeding on the open road and crossing of cars. There are no speed preventions in place to keep the residents, pedestrians and careful drivers safe on this busy roads. Manor road is an extremely busy road and the main route to the city hospital, the town centre, A38 and one of the busiest retail parks in Derby. It is extremely important that we act now and put deterrents in place to keep the road safe immediately. I suggest traffic lights opposite to Eastwood drive/half way down Manor Road to allow drives to stop on the road and allow safe crossing at the turning point in the road. I believe we should keep the turning point there as it allows traffic to flow and acts as turning point for drives to access different parts of derby, rather than travelling over a mile to reach a roundabout. The traffic lights will allow drivers to stop and give way to others in a safer way. The traffic lights will also allow pedestrians to walk and cross the road half way on manor road. This is safer for walkers and allows them to cross at a safe point with a light system in place. I believe Eastwood drive can remain open with a 3 part traffic light signal. The turning towards the end of manor road can also have a traffic light system working in a similar way. This will break up the flow of traffic, the speed of traffic and allow a safer commute for all and a safer street for residents to live on.
