

## Mole Valley District Council

### Personal Details:

Name:

E-mail:

Postcode:

Organisation Name:

### Comment text:

A simple balancing of forecast electorate between a target of 39 councillors equates to an optimal 1942 per Councillor. Boundary movements suggested, mainly between Ashtead's 3 wards, Bookham's 2 wards and between the 4 wards of Holmwood, Caple Leigh & Newdigate, Beare Green and Okewood. These changes would absorb some existing inequalities of representation and new inequalities created by removing a Councilor from, Ashtead Common, Bookham South and Holmwoods., The North/South Mole Valley quota of Cllrs, currently 23/19, is slightly leveled to 21/18. Further minor boundary changes, if desired, between Leatherhead North & South, and between Dorking North & South would reduce existing slight imbalances. Maximum of 2210 and Minimum of 1658 of forecast electorate per Cllr throughout Mole Valley, except for Leith Hill, where the greater area to cover makes up for a smaller very rural population of 1423. See accompanying table.
