Comment text:

In a time of severe cutbacks I cannot see any cost benefit analysis in the report that shows the overall cost to the tax payer and the cost benefits that would result. It seems we are just pandering to the wishes of central government to spend our money without any way to challenge the costs. What will happen to the councillor's that will be affected. Will they be dismissed without the electorate who they represent having a say. If they are dismissed how much will this save?
