WICK boundary change Objection: I object to this proposal on many grounds. The current system is stable, established and effect I see no reason to change. If change is necessary then Wick and Pershore do not make a compatible couple for obvious reasons. Here are just a few Wick is Rural community not a small town and has completely different needs and issue. with 5% of the population how can Wicks voice be heard? Wick is a conservation area and as such has challenges and opportunities that differ to Pershore and the current WDC councilors have a track record of recognizing and working effectively within the specific set of constraints this provides. Wick would be better left as is or if change is required then partnered with another rural representation of a similar demographic.
