### Comment text:

What an exercise in obfuscation! It is almost impossible to find out anything useful from this document which has been very poorly constructed. Where exactly 'they' are proposing to put Hinton on the Green I cannot discover. Hinton is a small parish which has close links with Aston Somerville and Sedgeberrow yet it seems the villages are to be separated in representation - in particular all of them lead out onto the treacherous A46 with which there are huge ongoing problems. Sedgeberrow and Hinton are linked by the River Isbourne and their interests in regards to flooding should be similarly linked. In conclusion I would say that there is no acceptable solution so the area should be left as it is whether this is fair in terms of representation or not. If it ain't broke then don't fix it - in other words. What a lot of money could have been saved without this consultation. With the saving something useful like drinking fountains could have been installed in the local area and maybe Hinton could have been provided with a defibrillator.
