I am strongly against this suggestion to incorporate the Parish of Wick into the Pershore ward on the grounds that Wick is a rural community with industry based on working farms whilst Pershore is a town with light industrial industries. Industrial and farming industries requires different needs and representation. Being in the Fladbury ward we have common interests and needs so working together like this is more efficient and effective. Wick is in a rural conservation area and is in a different ward band group with different rules and regulations for planning and development. The proposed changes will alter the character of this community
